PROTECTION FROM ONLINE FALSEHOODS AND MANIPULATION BILL

Why the Bill requires online platforms to spread corrections

A person who sees an online falsehood is not likely to see its correction.

Of 2500 persons surveyed,

NO ONE WHO SAW

false stories also saw the corrections

A certain false article by ONE SMAIL NEWS OUTLET reached as many people as corrections by 10 MAJOR NEWSPAPERS

70%

more likely that a false rumour will be shared than a true rumour

ALMOST NONE

of the online accounts that spread a certain false rumour also spread its correction

Research shows corrections work!
